

Issue: Sue Creek water quality

1. Funded study (MDE? DEPRM?) and restoration program for Sue Creek to include:
  - a. Water quality studies at the mouth, and in the smaller finger creeks
  - b. Water flow studies
  - c. Advice on riprap vs other shore erosion control methods based on water flow characteristics
  - d. Effect of pier removal at the mouth of the creek on water flow characteristics
  - e. Effect of causeway opening on effect of water flow/flushing.
  - f. Analysis of quality and number of existing shoreline habitats
  - g. Recommendation for regular water quality monitoring
  - h. Analysis of health and adequacy of shoreline SAV's
2. Increase shoreline SAV's in areas that have not been improved with SAV's .
3. Storm drains to be retrofitted to preserve the shoreline and control siltation
4. Directed educational program for watershed homeowners on use of lawn chemicals.

Issue: Preservation of Sue Creek environment

1. River Keeper program
  - a. Maintain channel markers and enforce no wake zone and speed limits
  - b. Handle complaints, marine enforcement (pollution, fire, police, sunken vessels, wildlife, bootleg marina, general critical area enforcement)
  - c. Possible hotline
2. Waterfront owners provided with refrigerator magnets with phone number to call for enforcement of violations
3. Marine Police substation at BYC
